PREPARATION PHASE

PROJECT OBJECTIVES

TEAM ID	PNT2022TMID49950
TEAM LEADER	JENIFER Y
TEAM MEMBER 1	SINDHUJA K
TEAM MEMBER 2	HARIHARAN K
TEAM MEMBER 3	KASI MOORTHI M

- For the success of each and every project, first the project objectives need to be framed so as to carry out the project with a smooth flow and bring out the desired output.
- The goal of the project is to create a kind of alarm system to detect the forest fire before or after the fire in order to enforce certain preventive measures.
- This can be achieved by using the Deep Learning and CNN model with the cumulative effect of the Artificial Intelligence technology.
- The objectives of this project can be summarized as follows: We will be able to learn how to get and prepare the dataset. We will be able to know how to do image processing.
 - We will understand how CNN layers are work.
 - Classify images using a Convolutional Neural Network.

- We will be able to know what are the activation functions can be used.
 - We will be able to know how to read images using OpenCV.
- We will know convolutional Neural Networks for Computer vision AI Problems.
- Upon completing all the above mentioned tasks or milestones we can obtain a model which can predict the forest fires at an early stage.
